

## Milliken OBEX Forma HD

### The Next Generation Forma

**ECONYL®**  
Made with 100% Regenerated Nylon

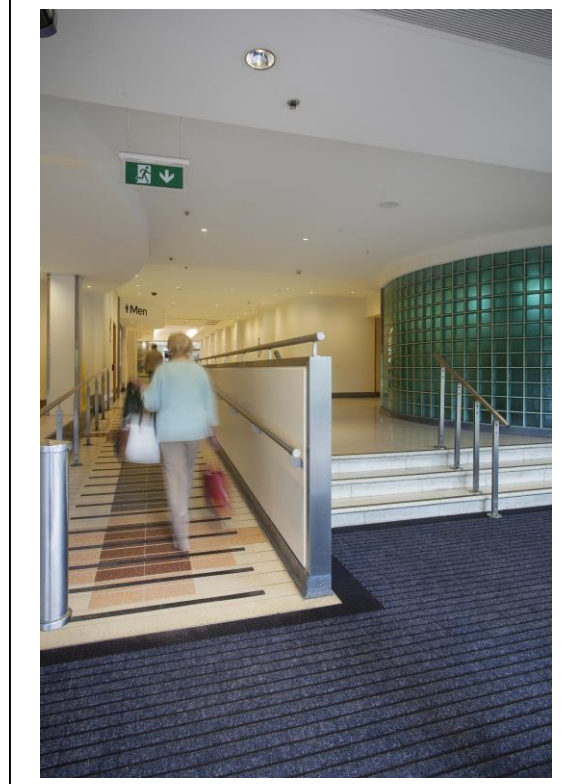

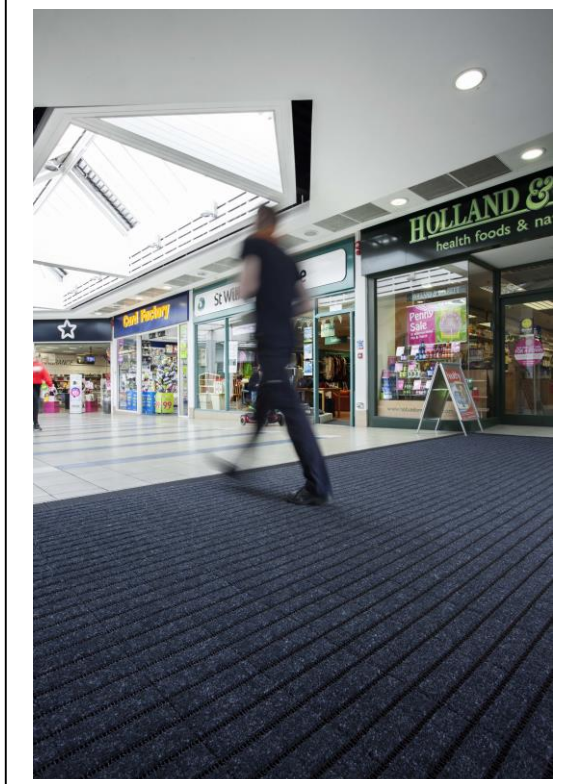

The new Milliken OBEX Forma HD is the latest generation of the much respected & renowned Milliken OBEX product range.

The unique textile inserts are manufactured with ECONYL® yarn which is 100% regenerated polyamide sourced from pre-consumer and post-consumer waste. Making OBEX Forma HD one of the most sustainable solutions with commitment to respecting the environment on the market.

Manufactured in modular tiles Milliken OBEX Forma HD can therefore fit any size or shape of mat well with the minimum of waste. Damaged sections can be replaced by changing only the individual tiles and not the complete unit as with other systems. The product is exceptionally durable and designed for high traffic areas and in the various colours available is excellent at concealing and retaining dirt and moisture whilst complimenting the interior design. The product has excellent wash and light fastness properties allowing all conventional carpet maintenance systems to be used for cleaning and has a 5-year guarantee.

## Milliken OBEX Forma HD

Available is a variety of stunning colour ways that can be mixed & matched for accent borders, checkerboards or patterns at no extra cost.

**Milliken's OBEX Forma HD** product enables complex shapes to be created whilst avoiding the need for the usual rigid t-bar constraints of other systems.

#### Textile Infill:

Yarn Type: 100% Polyamide 6.6 – mono & multi  
Pile Weight: Approx: 1075gr/m<sup>2</sup>  
Fire Resistance: BS4790  
Total Weight: Approx: 9.11kg/m<sup>2</sup> (16mm open)  
Wash Fastness: Xenotest: ISO-105.B01-:-> 6 Blue Scale

#### Tile Base:

Material: UV Resistant PVC  
Module Size: 20 x 20cm  
Thickness: 11mm or 16mm  
Colour: Graphite Black  
Temp Resistance: -30c up to +50c  
Durability: Vetterman test = 66,000 cycles (16mm)
