

# Coral<sup>®</sup> Classic

## Secondary 10mm Entrance Matting Carpet

Coral classic entrance flooring

Coral<sup>®</sup> classic has the capacity to absorb moisture like no other textile entrance system. Research shows that after just two steps across Coral<sup>®</sup> classic matting, almost 50% of foot borne moisture is absorbed. When hard flooring is installed, moisture absorption doesn't just prevent dirty footprints: it becomes a critical health and safety requirement as it helps to prevent accidental slipping and sliding. Alongside its excellent moisture-absorbing properties, Coral<sup>®</sup> classic also has special scraping monofilament yarns which actively scrape dirt off the soles of shoes.

As independent tests have shown, Coral<sup>®</sup> classic will provide effective performance for many years, and because it is manufactured using solution dyed yarn, it

will maintain its colour and good looks throughout its lifespan. For areas where there is a heightened risk of fire, Coral<sup>®</sup> classic FR can be supplied with a flame-retardant latex backing.

### Specifications

Total Weight: 3,600g/m<sup>2</sup> approx  
Pile Weight: 870g/m<sup>2</sup> approx  
Thickness: 10mm  
Pile Fibre: 100% Polyamide  
Backing: Everfort Vinyl  
Roll Length: 27.5lm  
Cut Lengths: Yes
